Louis Connor

Senior IT Project Manager | Applied AI & Technical Delivery

London / Manchester, UK • +44 7545 508516 • louismcleodconnor@gmail.com • **LinkedIn**

PROFILE

Senior IT Project Manager with 3+ years delivering enterprise Microsoft Copilot, Power Platform and AI adoption programmes. Manages concurrent projects from presales requirements through UAT, launch and user adoption, including a 5,000-user rollout at 96% active licence usage. Combines delivery governance with commercial ownership: £1m+ in closed client revenue and a £1.4m fixed-price portfolio. Founder of a UK e-commerce business grown to £300,000+ revenue, applying AI agents and automation to live operations.

CORE SKILLS

AI Adoption • Microsoft Copilot • AI Agents • Microsoft Power Platform • Microsoft Dataverse • Technical Project Management • Stakeholder Management • Commercial Management • Agile Methodologies • Change Management

PROFESSIONAL EXPERIENCE

Project Manager | WM REPLY | *April 2025 – Present*

- Lead enterprise AI adoption and Power Platform programmes end to end, from presales requirements through UAT, launch and user adoption, typically across six concurrent projects.
- Delivered 10+ Copilot adoption programmes, including a 5,000-user rollout reaching 96% active licence usage through 32 training sessions and executive enablement.
- Managed a 10,000-seat expansion engagement for a major financial institution.
- Led an 11-month, £250k+ Power Apps and Dataverse reporting programme across 250+ locations, cutting report generation from up to two hours to under five minutes.
- Coordinated developers, consultants and QA through two-week sprints, backlog management, UAT and release readiness in Azure DevOps.
- Captured requirements in presales, wrote SOWs and secured follow-on phases; contributed to £1m+ in closed client revenue across 40+ projects.
- Governed a £1.4m fixed-price Power Platform portfolio, including consultant forecasting, bookings and commercial governance.
- Internal Microsoft Planner SME across WM Reply and Reply sister companies; deliver training and modernise delivery tracking.
- Testing an autonomous project assistant agent in Azure AI Foundry, with knowledge-base integration.

Founder & Director | PEMLOSA | *September 2020 – Present*

- Founded and scaled a UK e-commerce business from a £6,000 initial investment to £300,000+ revenue, with 3,000+ transactions and 99% customer satisfaction.
- Launched a hero consumer electronics product: 1,000+ units sold at a 31% profit margin.
- Built an international supply chain across US and Asian suppliers: £200,000+ in product imports with a 4-day vendor-to-inventory lead time.
- Maintained 100% international delivery compliance post-Brexit; cross-border EU sales account for 8% of revenue.
- Migrated the store to Adobe Commerce on Google Cloud, reducing transaction fees by 2.5%.
- Built multi-agent AI workflows to automate market research, demand validation and product evaluation.

Project Manager | FEVER | *June 2022 – April 2023*

- Led market expansion into three UK cities: £500,000+ revenue and 10,000+ new customers within three months.
- Managed 25+ simultaneous event and venue launches across six UK cities: £1.25m+ revenue in six months, 4.6/5 customer satisfaction.
- Renegotiated supplier contracts and vendor rates, improving regional profit margins by 10%.
- Delivered weekly P&L reporting to executive leadership, tracking unit economics to inform expansion decisions.

Operations & Marketing Manager | **THE LACEHOUSE** | *July 2018 – November 2020*

- Grew average weekly revenue five-fold (£2,000 to £10,000) within six months through data-driven marketing and a customer service overhaul.
- Built a B2B corporate events pipeline generating £100,000+ in annual revenue.
